

SAFQUAL UK Award in
**Boom Lift Safe
Operator Training**

Overview:

The Award in Boom Safe Operator Training is a comprehensive program designed to equip individuals with the necessary knowledge and skills to become proficient and safe boom operators. This course focuses on the safe operation of boom lifts, also known as cherry pickers or aerial work platforms. Participants will learn about boom lift types, safety regulations, pre-operation inspections, proper use of controls, hazard identification, fall protection, and emergency procedures to ensure the safe and efficient operation of boom lifts.

Who is this for ?

This training program is designed for:

Construction workers operating boom lifts on job sites.

Warehouse and logistics personnel using aerial work platforms.

Maintenance and facility management teams working at height.

Health and safety officers responsible for site compliance.

Individuals seeking certification to improve employment prospects in industries requiring boom lift operation.

Assessment:

This qualification is evaluated using assessments and Multiple-Choice Questions (MCQ). To receive this qualification, the learner must pass both tests with a certain percentage.

Duration:

The qualification has recommended course duration of 4-5 days.

Note: However the course duration may be increased to meet additional learning needs if required but not reduced.

Validity :

Typically, such safety certifications are **valid for 2 to 3 years**

Modules

The course modules for the Award in Boom Safe Operator Training include:

- Introduction to boom lifts and their applications
- Types of boom lifts and their features
- Boom lift safety regulations and standards
