

**SAFQUAL UK Award in
Tower Crane Safe
Operator Training**

Overview:

The Award in Tower Crane Safe Operator Training is a comprehensive program designed to equip participants with the necessary knowledge and skills to operate tower cranes safely and effectively. The course covers essential aspects such as crane setup, load handling, communication, safety protocols, and maintenance procedures. Participants will learn about the different types of tower cranes, their components, and operational controls. Emphasis is placed on understanding and implementing industry best practices and regulatory guidelines to ensure safe crane operations.

Who is this for ?

This training is suitable for:

Aspiring Tower Crane Operators: Individuals seeking to enter the field of tower crane operation.

Current Operators: Professionals aiming to formalize or update their skills with recognized certification.

Site Supervisors and Managers: Personnel overseeing crane operations who require a comprehensive understanding of safe operational practices.

Health and Safety Officers: Individuals responsible for ensuring compliance with safety standards in workplaces involving tower crane use.

Assessment:

This qualification is evaluated using assessments and Multiple-Choice Questions (MCQ). To receive this qualification, the learner must pass both tests with a certain percentage.

Duration:

The qualification has recommended course duration of 4-5 days.

Note: However the course duration may be increased to meet additional learning needs if required but not reduced

Validity :

Sparrows Offshore Crane Operator Standard Stage 1 Certificate: Valid for two years upon successful completion.

Modules

The course modules for the Award in Tower Crane Safe Operator Training include:

- Introduction to tower cranes and their types
- Safety regulations and standards for tower crane operations
- Crane components and controls
