

SAFQUAL UK LEVEL 2 AWARD IN
**Emergency First
Aid at Work**

Overview:

The **UK Level 2 Award in Emergency First Aid at Work (EFAW)** is designed to provide learners with the essential skills needed to respond to workplace medical emergencies. This qualification meets **Health and Safety (First Aid) Regulations** and is ideal for businesses that require certified first aiders to handle **minor to moderate injuries and medical incidents**.

Overview:

Employees & Workplace First Aiders: Designated individuals responsible for first aid in the workplace.

Supervisors & Managers: Ensuring emergency preparedness and compliance with health & safety laws.

Construction & Industrial Workers: Handling job site accidents and medical emergencies.

Security & Public Safety Personnel: Responding to injuries in public spaces.

Retail, Hospitality & Office Workers: Dealing with customer or staff emergencies.

Teachers, Coaches & Caregivers: Assisting students and children in emergency situations.

Self-Employed & Small Business Owners: Ensuring workplace safety compliance.

Duration:

Typically 1 day (6 to 8 hours), depending on the training provider.

Assessment :

Practical Demonstration: Performing CPR, wound dressing, and emergency responses.

Written Examination: Multiple-choice questions on first aid principles.

Validity:

The certificate is valid for 3 years. A refresher course is recommended before expiration to maintain certification.

Modules :

- **Roles & Responsibilities of an Emergency First Aider:** Workplace first aid duties.
- **Basic Life Support (BLS) & CPR:** Performing chest compressions & rescue breaths.
- **Unconscious Casualty Management:** Recovery position and airway maintenance.
- **Choking Emergencies:** Assisting both adults and children.
- **Bleeding & Wound Care:** Treating minor to moderate cuts, burns, and injuries.
- **Shock & Medical Emergencies:** Recognizing and responding to strokes, heart attacks, and seizures.
- **Handling Workplace Accidents:** First aid for fractures, sprains, and head injuries.
- **Use of Automated External Defibrillator (AED):** Correct procedures for defibrillation.
