

SAFQUAL UK Award in CPR & First Aid

Overview:

The Award in CPR & First Aid provides participants with comprehensive knowledge and practical skills to effectively respond to medical emergencies and perform Cardio Pulmonary Resuscitation (CPR). The course covers essential first aid techniques, including assessing and managing various injuries and medical conditions. Participants will learn how to recognize and respond to cardiac arrest, choking, bleeding, fractures, burns, and other common emergencies. Emphasis is placed on the importance of quick and accurate response to maximize the chances of saving lives.

Who need this Qualification?

Employees & Workplace First Aiders Designated individuals responsible for first aid in the workplace.

- Supervisors & Managers Ensuring emergency preparedness and compliance with health & safety laws.
- Construction & Industrial Workers Handling job site accidents and medical emergencies.
