

SAFQUAL Level 2-Award in Confined Spaces Safety

Overview:

The Level 2 Award in Confined Spaces Safety is a comprehensive program designed to provide participants with essential knowledge and skills for safe operations within confined spaces. This course offers a thorough exploration of the hazards and risks associated with confined spaces, along with practical techniques to ensure the safety of individuals working in such environments. Participants will gain a deep understanding of regulatory requirements, risk assessments, and emergency procedures to effectively navigate confined spaces while minimizing potential dangers. Through a combination of theoretical instruction and practical exercises, attendees will develop the competence to promote safe practices and prevent incidents within confined spaces.

Who is this for ?

Workers entering confined spaces Employees working in tanks, tunnels, silos, sewers, and restricted areas.

- **Construction & Maintenance Workers:** Those handling confined space tasks in industrial settings.
- **HSE Officers & Supervisors:** Safety professionals overseeing confined space operations.
- **Emergency Response Teams:** Personnel responsible for confined space rescue and emergency management.
- **Anyone required to work in confined spaces:** Individuals who need formal training for legal compliance.

Assessment:

The qualification is evaluated using assessments. To receive this qualification the learner must pass test with 70%.

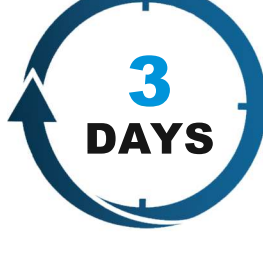

Duration:

The qualification has recommended course duration of 3 days.

Note: However the course duration may be increased to meet additional learning needs if required but not reduced.
