

SAFQUAL Award in Electrical Safe Work Practices

Overview:

The Award in Electrical Safe Work Practices is designed to provide participants with the necessary knowledge and skills to work safely with electricity. This course focuses on understanding electrical hazards, implementing safe work practices, and maintaining electrical equipment to prevent accidents and injuries. Participants will learn about relevant legislation and regulations governing electrical safety and gain practical insights into risk assessment and control measures. The course aims to enhance participants awareness of electrical safety best practices and empower them to create a safe working environment

Who is this for ?

- **Electricians & Electrical Technicians:** Professionals working with electrical systems.
- **Maintenance & Facility Managers:** Those responsible for electrical safety in workplaces.
- **Construction Workers & Engineers:** Personnel dealing with electrical installations.
- **Health & Safety Officers:** Ensuring compliance with electrical safety regulations.
- **Industrial & Manufacturing Workers:** Those working around high voltage equipment.
- **Anyone Working with or Around Electricity:** Ideal for employees exposed to electrical hazards.

Assessment:

The qualification is evaluated using assessments. To receive this qualification the learner must pass test with 70%.

Duration:

The qualification has recommended course duration of 5 days.

Note: However the course duration may be increased to meet additional learning needs if required but not reduced

Validity :

This certification is valid for a life time

Modules

The specific modules covered in the Award in Electrical Safe Work Practices course typically include:

- Introduction to electrical safety principles and regulation
- Identification of electrical hazards and associated risks.
- Lockout/Tag out procedures.
- Electrical equipment, circuits, and protective devices.
- Electrical risk assessment and control measures.
- Personal protective equipment (PPE).
- Electrical incident investigation and reporting.
- Emergency procedures and response.
- Maintenance and inspection.
- Electrical safety audits and compliance.

Why choose us?

Accredited & Industry Recognized Certification: Meets workplace safety standards.

Expert Led Training: Delivered by experienced electrical safety professionals.

Hands On Practical Learning: Real world applications of electrical safety procedures.

Flexible Learning Options: Classroom, online, blended formats available.

Reduces Workplace Accidents: Helps organizations minimize electrical hazards.
