

SAFQUAL Award in Electrical Safety Awareness

Overview:

The Award in Electrical Safety Awareness is designed to provide participants with a comprehensive understanding of electrical safety principles and best practices. The course aims to equip individuals with the knowledge and skills necessary to identify electrical hazards, mitigate risks, and promote a safe working environment. Participants will learn about relevant legislation, safety standards, and codes of practice applicable to electrical systems. The course also covers key concepts related to electrical shock, fire prevention, and emergency response. Practical exercises and case studies are incorporated to enhance understanding and application of the learned concepts.

Who is this for ?

- **Non Electrical Workers:** Employees who work near electrical equipment but do not perform electrical work.
- **Maintenance & Facility Staff:** Individuals responsible for workplace safety.
- **Construction Workers & Site Operatives:** Those working in environments with electrical risks.
- **Health & Safety Officers:** Professionals overseeing workplace safety compliance.
- **Supervisors & Managers:** Those responsible for ensuring a safe working environment.
- **Anyone Exposed to Electrical Hazards:** Workers in industrial, commercial, domestic environments.

Assessment:

The qualification is evaluated using assessments. To receive this qualification the learner must pass test with 70%.

Duration:

The qualification has recommended course duration of 5 days.

Note: However the course duration may be increased to meet additional learning needs if required but not reduced

Validity :

This certification is valid for a life time

Modules

The specific modules covered in the Award in Electrical Safety Awareness course typically include:

- Introduction to Electrical Safety
- Electrical Principles
- Electrical Hazards and Risk Assessment
- Electrical Safety Legislation and Standards
- Safe Working Practices
- Electrical Shock and First Aid
- Fire Prevention and Protection
- Emergency Response
- Electrical Equipment Inspection and Maintenance
- Practical Exercises

Why choose us?

Expert Led Training: Taught by experienced safety professionals.

Practical & Real World Application: Designed for non electricians working near electrical risks.

Flexible Learning Options: Available in classroom, online, blended formats.

Prevents Workplace Accidents: Essential for maintaining a safe work environment.

Enhances Workplace Safety Culture: Educates employees on how to work safely around electricity.
