

SAFQUAL Level 2 Award in Basic Electrical Safety

Overview:

The Level 2 Award in Basic Electrical Safety is a comprehensive course designed to provide participants with a solid foundation in electrical safety practices and regulations. This course is specifically tailored for individuals who work with or around electrical systems and equipment, aiming to enhance their knowledge and understanding of electrical safety. Participants will gain essential skills to identify electrical hazards, implement preventive measures, and respond effectively to electrical emergencies. The course combines theoretical learning with practical applications to ensure participants can apply their knowledge in real world scenarios.

Who is this for ?

- **Electricians' Assistants & Trainees:** Those new to electrical work.
- **Maintenance & Facility Staff:** Individuals handling electrical systems.
- **Construction Workers & Site Operatives:** Those working near electrical installations.
- **Health & Safety Officers:** Responsible for electrical safety compliance.
- **Supervisors & Managers:** Overseeing workers exposed to electrical hazards.
- **Anyone Working with or Around Electrical Equipment:** Industrial, commercial, domestic environments.

Assessment:

The qualification is evaluated using assessments. To receive this qualification the learner must pass test with 70%.

Duration:

The qualification has recommended course duration of 3 days.

Note: However the course duration may be increased to meet additional learning needs if required but not reduced.

Validity :

This certification is valid for a life time

Modules

The specific modules covered in the Level 2 Award in Basic Electrical Safety course typically include:

- Introduction to electrical safety
- Electrical hazards and risks
- Safe Electrical work practices
- Electrical safety equipment
- Electrical systems
- Electrical emergencies and response
- Practical exercises

Why choose us?

Recognized & Accredited Qualification: Meets industry safety standards.

Expert Instructors: Training led by experienced electrical safety professionals.

Hands On Learning: Practical safety demonstrations for real world application.

Flexible Study Options: Classroom, online, blended learning available.

Reduces Workplace Accidents: Essential training for workplace electrical safety.

Enhances Career Prospects: Beneficial for anyone working with electrical systems.
