

Level 4 Award in Electrical Safety Management

Overview:

The Level 4 Award in Electrical Safety Management is a comprehensive course designed for professionals responsible for managing and overseeing electrical safety in the workplace. This course provides participants with advanced knowledge and skills to develop, implement, and maintain effective electrical safety management systems. Participants will learn how to assess electrical risks, develop safety policies and procedures, conduct audits and inspections, and ensure compliance with relevant regulations and standards. The course emphasizes the integration of electrical safety into overall health and safety management, equipping participants with the expertise to lead and drive continuous improvement in electrical safety practices.

Who is this for ?

- **Electrical Safety Managers & Consultants:** Overseeing electrical safety policies and compliance.
- **Senior Electricians & Engineers:** Handling complex electrical systems and high-risk environments.
- **Health & Safety Managers:** Responsible for electrical safety protocols in workplaces.
- **Facility & Maintenance Managers:** Ensuring the safety of electrical infrastructure.
- **Supervisors & Team Leaders:** Managing electrical safety teams and operations.
- **Compliance & Risk Officers:** Ensuring adherence to national and international safety standards.

Assessment:

The qualification is evaluated using assessments. To receive this qualification the learner must pass test with 70%.

Duration:

The qualification has recommended course duration of 7 days.

Note: However the course duration may be increased to meet additional learning needs if required but not reduced.

Validity :

This certification is valid for a life time

Modules

The specific modules covered in the Level 4 Award in Electrical Safety Management course typically include:

- Principles of electrical safety management
- Legal and regulatory frameworks
- Electrical risk assessment and control
- Safety management systems
- Policy and procedure development
- Training and competency
- Auditing and performance measurement
- Incident investigation and analysis
- Emergency planning and response
- Contractor management
- Change management
- Continuous improvement

Why choose us?

Globally Recognized Certification: Meets international safety management standards.

Led by Industry Experts: Delivered by seasoned electrical safety professionals.

Practical & Real World Learning: Case studies and risk assessment exercises.

Flexible Learning Options: Classroom, online, blended formats available.

Boosts Career Progression: Essential for managers, consultants, and senior engineers.

Ensures Legal & Regulatory Compliance: Helping organizations meet safety obligations.
