

SAFQUAL Level 2 Award in Work at Height Safety

Overview:

The Level 2 Award in Work at Height safety is a comprehensive program designed to provide participants with essential knowledge and practical skills for conducting work safely at elevated locations. This course explores the nuances of working at height, emphasizing hazard identification, risk assessment, and the implementation of preventive measures. Participants will gain a deep understanding of safety regulations, equipment utilization, and emergency response protocols when operating at height. Through a combination of theoretical instruction, practical demonstrations, and hands-on exercises, attendees will develop the competence to mitigate risks, ensure personal safety, and promote a culture of secure work practices in elevated work environments.

Who is this for ?

- **Construction & Maintenance Workers:** Working on scaffolding, ladders, elevated platforms.
- **Roofers & Window Cleaners:** Operating on rooftops and high surfaces.
- **Warehouse & Industrial Workers:** Handling elevated storage and racking systems.
- **Health & Safety Representatives:** Implementing workplace height safety measures.
- **Telecommunication & Wind Energy Workers:** Climbing towers and turbines safely.
- **Anyone Working at Height:** Who needs safety training to minimize fall risks.

Assessment:

The qualification is evaluated using assessments. To receive this qualification the learner must pass test with 70%.

Duration:

The qualification has recommended course duration of 3 days.

Note: However the course duration may be increased to meet additional learning needs if required but not reduced

Validity :

This certification is valid for a life time.

Modules

The specific modules covered in the SAFQUAL Level 2 Award in Work at Height Safety course typically includes:

- Introduction to Work at Height
- Work at height policy
- Risk Assessment for work at Height
- Hierarchy of risks and hierarchy of control
- Work at height Equipment Usage

- Ladders types and precautions.
- Fall Prevention and Protection
- Emergency Response
- Safe Work Practices

Why choose us?

Experienced Instructors: Learn from height safety professionals.

Hands On Practical Training: Real world exercises and simulations.

Flexible Learning Options: Classroom, on site, blended learning available.

Enhances Workplace Safety & Compliance: Reduces risks and improves safety culture.

Boosts Career Prospects: Essential qualification for anyone working at height.
