

SAFQUAL Level 2 Award in Basic Scaffolding Safety

Overview:

The Level 2 Award in Basic Scaffolding Safety is a foundational course that provides participants with essential knowledge and skills related to scaffolding safety. This course is suitable for individuals who are involved in construction, maintenance, or any other industry where scaffolding is used. Participants will learn about the key principles of safe scaffolding practices, including scaffold erection, inspection, maintenance, and dismantling.

Who Is This For?

This course is suitable for:

- **Construction Workers:** Individuals involved in construction activities who require a basic understanding of scaffolding safety.
- **Maintenance Personnel:** Workers responsible for the up keep of structures that utilize scaffolding.

- **Scaffolding Laborers:** Those assisting in scaffolding operations, aiming to enhance their safety awareness.
- **Site Supervisors and Managers:** Professionals overseeing projects where scaffolding is employed, ensuring compliance with safety standards.

Duration:

The qualification has recommended course duration of 3 days.

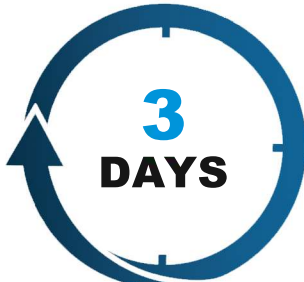

Note: However, the course duration may be increased to meet additional learning needs if required but not reduced.

Assessments:

The qualification is evaluated using assessments. To receive this qualification the learner must pass test with 70%.

Validity:

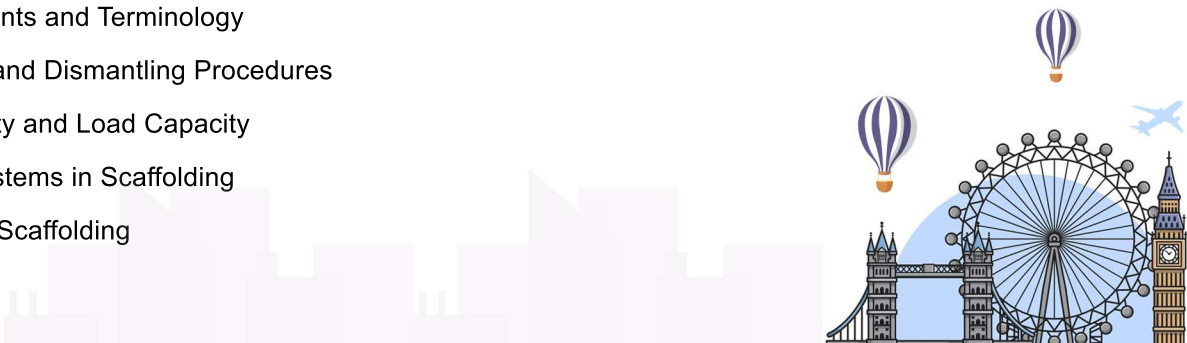

This certification is valid for a life time.

Modules

The course modules for the Level 2 Award in Basic Scaffolding Safety may include:

- Introduction to Scaffolding Safety
- Roles and Responsibilities in Scaffolding Operations
- Types of Scaffolding and their Uses
- Scaffold Components and Terminology
- Scaffold Erection and Dismantling Procedures
- Scaffolding Stability and Load Capacity
- Fall Protection Systems in Scaffolding
- Eletrical Safety in Scaffolding

- Hazards Identification and Risk Assessment
- Emergency Procedures and Response

Why Choose Us?

Led by Industry Experts: Learn from experienced height safety professionals.

Practical & Real World Training: Hands on exercises and case studies.

Flexible Learning Options: Classroom, online, blended learning.

Essential for Workplace Safety & Compliance: Helps prevent accidents and ensures regulatory adherence.

Boosts Career Advancement: Valuable for supervisors, managers, and trainers.
