

SAFQUAL Award in Forklift Safe Operator Training

Overview:

The Award in Forklift Safe Operator Training is designed to provide participants with comprehensive knowledge and practical skills to operate forklifts safely and efficiently. The course focuses on the principles of forklift operation, risk assessment, load handling, and site specific safety protocols. Participants will learn about the different types of forklifts, their components, and how to perform pre operational checks. The course emphasizes safe operating techniques, including maneuvering, lifting, and stacking loads. It also covers the importance of communication, hazard awareness, and emergency procedures.

Who is this for ?

This training is ideal for:

- **Aspiring Excavator Operators:** Individuals seeking to enter roles that involve operating forklifts.

- **Current Operators:** Professionals aiming to formalize or update their skills with recognized certification.
- **Employers:** Businesses looking to ensure their staff are trained to operate forklifts safely, thereby reducing

Assessment:

The qualification is evaluated using assessments. To receive this qualification the learner must pass test with 70%.

Duration:

The qualification has recommended course duration of 4 days.

Note: However the course duration may be increased to meet additional learning needs if required but not reduced.

Validity :

Certification is valid for **3 years** upon successful completion.
