

SAFQUAL Award in Hydrogen Sulphide Safety Train the Trainer

Overview:

The SAFQUAL Award in Hydrogen Sulphide Safety Train the Trainer course is specifically designed for individuals who wish to become certified trainers in hydrogen Sulphide (H₂S) safety. The course aims to equip participants with in depth knowledge of H₂S properties, hazards, and control measures. Attendees will learn effective training techniques to educate others about the risks associated with H₂S exposure and how to implement appropriate safety measures. The program will cover theoretical concepts, practical training methodologies, and assessment techniques to ensure trainers can effectively deliver H₂S safety courses to diverse audiences.

Who need this qualification?

- **Experienced safety professionals:** Those looking to train others in H₂S safety.
 - **Supervisors & managers:** Responsible for workplace safety in industries where H₂S exposure is a risk.
 - **HSE officers & trainers:** Health, safety, and environmental professionals who conduct safety training.
 - **Oil & gas industry workers:** Those working in drilling, refining, or gas processing.
 - **Rescue & emergency response personnel:** Individuals involved in handling H₂S related emergencies.
 - **Anyone seeking to become an H₂S safety trainer:** Those wanting to deliver certified H₂S safety training.
- This course is ideal for professionals who want to train others in H₂S awareness, detection, and emergency response.

Assessment:

The qualification is evaluated using assessments. To receive this qualification the learner must pass test with 70%.

Duration:

The qualification has recommended course duration of 7 days.

Note: However the course duration may be increased to meet additional learning needs if required but not reduced.

Validity :

This certification is valid for a life time

Modules

The course modules for the Award in Hydrogen Sulphide Safety Train the Trainer may include:

- Introduction to Hydrogen Sulphide (H₂S) Safety
- Properties and Characteristics of H₂S Gas
- Health Hazards and Effects of H₂S Exposure
- H₂S Detection, Monitoring, and Alarm Systems
- H₂SRisk Assessment and Hazard Control
- Personal Protective Equipment (PPE) for H₂S Environments
- H₂S Emergency Response and Evacuation Procedures
- Ventilation and Air Quality Management in H₂S Areas
- H₂S Contingency Plans and Safety Regulations
- Training Techniques and Instructional Design for H₂S Safety
- Conducting Practical Drills and Exercises
- Assessment and Evaluation of H₂S Safety Training

Why choose us?

Globally Recognized Certification: Valid in oil & gas, chemical, and industrial sectors.

Expert Led Training: Delivered by experienced H₂S safety professionals.

Comprehensive Course Content: Covers H₂S hazards, detection, emergency response, and teaching techniques.

Flexible Learning Options: Online, in person, blended learning available.

Practical & Industry Focused: Real world case studies and hands on training.

Career Advancement: Become a certified H₂S safety trainer and boost your professional growth.
